

SECTION 07620 - SHEET METAL FLASHING AND TRIM

A. SUMMARY

1. Flashing and Trim:
 - a. Concealed through-wall metal flashing.
 - b. Reglets.
 - c. Gutters.
 - d. Downspouts.
 - e. Conductor heads.
 - f. Splash pans.
 - g. Roof-drain flashing.
 - h. Scuppers.
 - i. Built-in gutters.
 - j. Exposed trim, gravel stops, and fasciae.
 - k. Copings.
 - l. Base flashing.
 - m. Counterflashing.
 - n. Flashing receivers.
 - o. Valley flashing.
 - p. Drip edges.
 - q. Eave flashing.
 - r. Equipment support flashing.
 - s. Roof-penetration flashing.
 - t. Shower pans.
 - u. Overhead-piping safety pans.
 - v. Roof expansion-joint covers.
 - w. Roof-to-wall expansion-joint cover.

B. QUALITY ASSURANCE

1. Mockups for sheet metal fabrications.
2. Standards: SMACNA.

C. MATERIALS

1. Metals:
 - a. Copper.
 - b. Lead-coated copper.
 - c. Aluminum.
 - d. Stainless steel.
 - e. Terne-coated stainless steel.
 - f. Galvanized steel.
 - g. Aluminum-zinc alloy-coated steel.

- h. Coil-coated galvanized steel.
 - i. Lead.
- 2. Finishes:
 - a. Aluminum: [**Mill finish**] [**Class I, clear anodic**] [**Class I, color anodic**] [**High-performance organic coating**].
 - b. Coil-Coated Galvanized Steel: High-performance organic coating.
 - c. Rain Drainage Units: Baked-on, acrylic shop finish.
